

Austin N. Amos, DDS, JD  
4200 Main Street  
The Colony, TX 75056  
Ph: 972.625.4746

---

## **We are ready to reopen on Wednesday, May 6!** **...And we are looking forward to seeing you!**

For everyone's safety, we are limiting and staggering the number of patients to help minimize personal contact and wait times. We have also instituted new office procedures to enhance the safety of our patients and staff. Being able to provide each patient with the best possible care in the safest possible environment is our priority. **Please read the following changes carefully before your next appointment:**

### **BEFORE ARRIVING**

- Our **COVID-19 Health Screening Questionnaire** must be filled out and signed electronically **BEFORE** any patient comes in the office. If any answers are "YES", we must reschedule you for a later date for everyone's safety.
- Please **brush your teeth prior to arriving** for your appointment.

### **CURBSIDE CHECK-IN**

- When you arrive for your appointment, park in our lot and text 972-625-4746 or call 972-625-4746 with the patient's name. **Please wait in your car and we will text/call you back when we're ready for you or your child to come in.**
- In keeping with new regulations, only the patient may enter the building unless it is a minor to be accompanied by one parent or a patient requiring a physical assistant to help that patient enter and be seated.
- Anyone entering our office must be wearing a mask or covering.
- Upon entering the office, we will take your temperature in the reception area, confirm your answers to the COVID-19 screening questionnaire, and ask you to use hand sanitizer.
- We will then escort patients directly to their assigned chair.

### **ADDITIONAL PRECAUTIONS**

- Unfortunately, we will no longer have our coffee bar, magazines, X-box, or kids' corner.
- We will use a HEPA vacuum system to control air quality in the reception, corridor and treatment areas.

- We will be donning extra personal protective equipment and using additional suction devices or isolation to minimize aerosols.

**If you already have an appointment scheduled, please be patient, as we will be calling to reschedule in order of necessity.**

**Thank you for your patience and loyalty**

If you have any questions please call us at 972-625-4746.
